

PARKER SPENT \$68,000  
TO DEVELOP AN INK  
... that cleans a pen as it  
writes

We developed QUINK—the quick-drying ink, to protect Parker Pens from inks that clog and gum.

Fountain pen repair records show that two-thirds of the troubles arising in fountain pens are due to old type pen-clogging inks.

We determined to correct this abuse at any cost. We spent 3 years and made up 1022 formulas then developed QUINK—it contains a solvent that dissolves the sediment left in pens by other inks.

## No More Clogged Up Fountain Pens

*... due to a new and  
remarkable discovery  
in ink making.*

10 Improvements Introduced by

# Parker Quink

*... the Quick-Drying Ink*

- 1 QUINK remains moist inside the feed channels of a fountain pen.
- 2 QUINK dries 31% quicker on paper.
- 3 QUINK cleans a pen as it writes—due to a secret solvent that dissolves the sediment and gum left by other inks.
- 4 QUINK protects pens against the abuse of old pen-clogging inks, which are responsible for  $\frac{2}{3}$  of the repair service on all fountain pens.
- 5 QUINK'S color is brilliant and vivid, full bodied and rich—not weak and watery.
- 6 QUINK'S flow keeps pace with your hand at any speed.
- 7 Permanent QUINK lasts as long as the paper.
- 8 Washable QUINK is easily removed from fingers and fabrics.
- 9 QUINK keeps a desk pen moist when not in use, due to a chemical that absorbs moisture instead of releasing it.
- 10 QUINK is the result of 3 years' work in making up 1022 formulas to produce a miracle ink.

Parker Quink—the Quick-Drying Ink

Two Kinds: Permanent: Blue-Black, Green, Red,  
Violet, Black

Washable: Blue Only

See This Utterly New and Revolutionary Pen!

# HOLDS TWICE AS MUCH INK

... with no increase in size

## First Sacless Pen

without piston pump  
or valves...

DEVELOPED by  
PARKER

from a scientist's  
marvelous invention  
The Vacuum Filler

Go now to any  
dealer's—see this  
new miracle per-  
form!

—See how vacuum  
is created inside the  
pen barrel.

—See the ink rush  
in and fill it com-  
pletely.

—See why this sac-  
less pen carries  
102% more ink  
than pens of equal  
size with rubber  
ink sacs.

—See the velvet-  
like beauty of its  
smart, laminated  
barrel—a wholly  
new, exclusive, and  
patented style—  
non-breakable.

—See its unique  
Reversible point  
that writes two  
ways—writes your  
regular hand—  
broad, medium or  
fine—on the lower side,—  
writes finer on the upper  
side for figuring and inter-  
lining. This point is a  
revelation—of precious  
platinum and gold, tipped  
with a pellet of rare Iri-  
dium. Utterly smooth,  
instantly responsive, flaw-  
lessly writing.

If you're willing to pay \$7.50,  
you won't be willing to carry—or  
to give—any other pen. If you  
wish to pay less, get a pen with a  
rubber ink sac by naming your  
price to the dealer—but be sure to  
name top quality as well—say  
"Parker"—and accept no second  
best. The Parker Pen Company,  
Janesville, Wis.

Junior Vacuum  
Filler Pen with-  
out platinum  
plated point,  
writes regular  
way, \$5; pencil,  
\$2.50.

HOLDS 102% MORE INK		<p><i>Upper side writes hair- line or extra fine or fine</i></p> <p><i>Lower side writes fine, or medium or broad, etc.</i></p>
